Moai heads on Easter Island

More moai heads

Easter Island is located in the South Pacific Ocean

### Easter Island: Mysterious Statues

Have you ever seen people moving a giant statue? They use a crane. How did ancient people move giant statues?

Ancient people on Easter Island carved more than 800 large stone statues, called *moai*. They put the *moai* around the island. Each *moai* is taller than an elephant and heavier than two elephants. How did people move them? There were no cranes a thousand years ago.

We can't ask the Easter Island people. They have disappeared. But we can still see their statues on the island.

**It's a mystery.**
